BRIAN@MANUFACTURINGCONTENT.COM

SUMMARY

Creative iOS engineer with 10+ years of experience building expressive, high-performance mobile apps across video, audio, and real-time interaction. Strong product intuition and a track record of shipping polished user experiences in fast-moving environments.

Core Skills: Swift, SwiftUI, Combine, AVFoundation, Concurrency, Real-time Media, AI/ML Integration, Docker, AWS/GCP

EXPERIENCE

Twisty (Remote) - AI Video Generation - Senior Product Engineer

2023 - 2024

- Owned end-to-end delivery of new video capabilities from experimentation to production rollout
- Collaborated closely with design and product to shape user-facing creative tools powered by generative models

Bright Live Inc. (Remote) - Live Video Sessions - Senior iOS Engineer

2020 - 2022

- Architected and maintained a SwiftUI application enabling real-time, low-latency video interaction between creators and audiences
- Implemented a reactive data flow with Combine, improving consistency across iPhone, iPad, and macOS

Smule (SF, CA) - The World's Biggest Singing App - Senior iOS Engineer

2019 - 2019

- Delivered features enabling users to record, edit, and share performances with low-latency audio-video sync
- Worked on features requiring precise timing, media APIs, and highly polished UX

Manufacturing Content - Independent iOS Development - Founder

2012 - 2019

- Demonstrated end-to-end ownership and rapid iteration across multiple shipped App Store projects including Songbird, a lyric-video creation app

EDUCATION

Berklee College of Music, Boston, MA - B.M. in Music Synthesis
